INFR3120 – Web and Scripting Programming
Assignment 1
Portfolio Site using HTML and CSS

Due October 9th, 2026 @ 11:59 pm

Value 8%

Portfolio Site **Maximum Mark: 60**

Overview: Create your Personal Portfolio Website using **HTML-5 and CSS-3**. Your site must be hosted live on GitHub (GitHub Page).
All work must be your own with the following conditions:

External code (e.g. from the internet or other sources) can be used for student submissions within the following parameters:

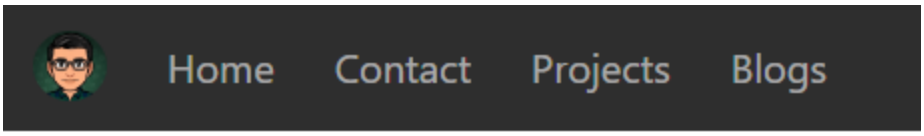

1. The code source (i.e. where you got the code and who wrote it) must be cited in your internal documentation (Readme file). If not, then it will be considered as Plagiarism.
2. It encompasses a maximum of 10% of your code (any more will be considered cheating). Students can use any amount of the code from the lectures, above 10% is only for code outside the lectures.
3. You must understand any code you use and include documentation (comments) around the code that explains its function.

All submissions will undergo a code review, during which you may be asked to explain any part of your assignment. For marking purposes, 30 students from each section will be randomly selected for this review, and their grades will be assigned after they have explained their code. If you receive an email from the TA regarding a code review, please reply within 1–2 business days to arrange a meeting.

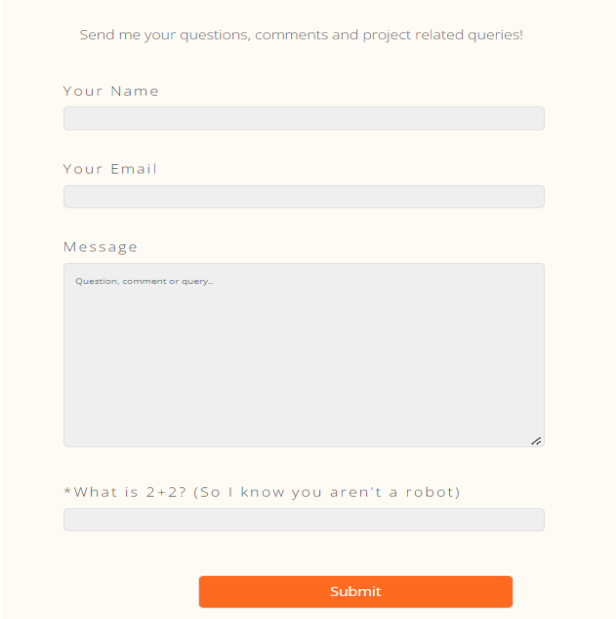

Instructions:

This webpage must include the pages from your Personal Portfolio, 4 different pages (four different html files, **it shouldn't be a single page application**) – your **Home page**, an **About Me** page, a **Projects page**, and a **Contact Me** page. **Single page portfolio will be marked as 0**.

1. Site Structure and Functionality: **(3 + 3 + 3 + 5 + 2 + 4) 20 Marks**
    a. Home page should contain a Navigation for About Me, Project and Contact Me Page. Below is just an example, yours one can be different.

b. Add a photo and small introduction about yourself on About me Page. **Image must be yours along with the video**. You should also embed a short introductory video about yourself in it or you can add any small video in the same page using HTML-5, display video controls and poster element for the video. (video should be between 45-60 seconds)
c. Project page should include about the projects/assignments you worked on like from any other subject from your previous semesters. Give one heading of the project and explain it in 2-3 lines. Write down at least 4 to 5 Projects.
d. Contact me page should contain a form through which visitor can contact you by filling it. Do apply the validation rules on the form like on Email, Phone etc. Form can have Name, Email, Cell No., Comments and Submit Button. Below is just a sample

e. In the footer add the email for contact and your copyright. Below is the sample

f. Must use the semantic tags where required like <header> <footer><nav><article> etc.

2. GUI/Interface **(5+3+2) 10 Marks**
   - **a.** Web page must be responsive using Fluid Design and Media Queries. **We are not using Flexbox in the course, so it is not allowed, use of flexbox will be marked as 0 in this section.** Use separate CSS file for different view ports (mobile, tablet and laptop). **Explain in readme file what dimensions you used for each view port and why.**
   - **b.** Use linear gradient and angle linear gradient in any page out of 4 pages (Home, about me, Project and Contact me) or div of your choice. **Write in readme file where did you use them.**
   - c. Create/Use the color scheme of your choice (https://color.adobe.com/create). **Show/Explain us which scheme you used in Readme file.**
3. Testing and Validation: **(3 + 3 + 2+ 2+ 3 = 13 Marks)**
   - a. Validate/Test your HTML code using W3C Markup Validation Service (http://validator.w3.org/).
   - b. Validate/Test your CSS code using W3C CSS Validation Service (http://jigsaw.w3.org/css-validator/).
   - c. Validate/Test links using W3C Link Checker (http://validator.w3.org/checklink).
   - d. Check the spelling with the tool of your choice
   - e. Test the page for Accessibility in WAVE (http://wave.webaim.org/).
4. Share your files on **GitHub** to demonstrate Version Control Best **(3 + 3 + 4 = 10 Marks).**
   - a. Your repository must include **your code** and be well structured (2 Marks: Version Control). **Any code posted on GitHub other than commands will be marked as 0**.
   - **b.** Your repository must be public and include **commits** that demonstrate the project being updated at different stages of development – each time a major change is implemented (2 Marks: Version Control).
   - c. Site must be deployed on GitHub page. **At this stage students are not allowed to use any other cloud provider**. (4 Marks)
5. Readme file **7 Marks**

SUBMITTING YOUR WORK

Your submission should include:

1. A link to your live portfolio site hosted with a Cloud provider (GitHub Page)
2. Submit the .zip file on Canvas
3. Link of GitHub repository
4. Private GitHub repository will get 0 marks in version control part.

Portfolio Website Rubric

Total: 60 Marks

Criteria	Excellent (Full Marks)	Good (75%)	Satisfactory (50%)	Needs Improvement (25% or below)	Marks
1. Site Structure and Functionality (20 Marks)					
a. Navigation (3)	All pages linked properly with clear navigation	Minor linking/naming issues	Navigation present but not working	Missing navigation	/3
b. About Me (3)	Photo + intro + functional embedded video with poster & controls	Missing 1 element (e.g., poster)	Video present but poorly embedded or broken or Missing 2 elements (e.g., poster and photo)	Little or no content or all missing elements	/3
c. Project Page (3)	Multiple projects described with clarity, html headings and	Part of the explanation is not properly presented using html and CSS	Only html or CSS part is clearly presenting the material.	Projects Page is missing or Blank	/3

	explanations are clear				
d. Contact Form (5)	All fields + validations work correctly	Minor issues with validations	Form present but not fully functional	Form missing or broken	/5
e. Footer (2)	Contains all required info, well formatted	Minor formatting issues	Info incomplete	Footer missing	/2
f. Semantic Tags (4)	Correct and meaningful use throughout	Some tags misused/missing	Basic use only	No use of semantic HTML	/4
2. GUI/Interface (10 Marks)					
a. Responsiveness (5)	Fully responsive using fluid design + separate CSS + explained in README	Mostly responsive with explanation	Basic responsiveness, incomplete explanation	Not responsive or used Flexbox, no explanation	/5
b. Gradients (3)	Correct use of linear & angle gradients + described in README	Used but not described or inconsistent	One gradient only or poorly applied	Not used or incorrect	/3
c. Color Scheme (2)	Consistent scheme from Adobe + explained in README	Minor inconsistency or explanation	Poorly applied or no explanation	Not used	/2

3. Testing and Validation (13 Marks)					
a. HTML Validation (3)	0 errors and validated	Minor warnings only	Several warnings/errors	Not validated	/3
b. CSS Validation (3)	0 errors and validated	Minor warnings	Several issues	Not validated	/3
c. Link Checker (2)	All links work + validated	1–2 broken links	Some broken links	Not checked	/2
d. Spell Check (2)	No spelling errors	Few minor errors	Many typos	Not checked	/2
e. Accessibility (3)	Passes WAVE with no issues	Minor issues	Some issues	Not tested	/3
4. Version Control (GitHub) (10 Marks)					
a. Repo Structure (3)	Organized repo with all code	Some structure issues	Poorly organized repo	No GitHub repo	/3
b. Commits (3)	Regular commits showing progress	Infrequent commits	Few commits, poor messages	One or no commit	/3
c. Deployment (4)	Site live on GitHub Pages	Deployed but with minor issues	Attempted but broken	Not deployed	/4
5. README File (7 Marks)	Detailed with viewport sizes, gradients, and color	Missing one of the points from described points	Vague or unclear explanations	README missing	/7

	scheme explanations				

This assignment weighs **8%** of your total mark for this course.

Late submissions:

- 20% deducted for each day late. After 48 hours of deadline no submission will be accepted.
